## Full-Range of Seating Choices

The *Scout M series* can be equipped with a rehab seat. This seating system allows the use of **specialized seating** components, and can be **custom fit** to you. In addition to the standard foot plate, elevating leg rests and swing-away detachable foot rests are available options on all Scout seating choices. Seat cushions, seat backs and solid seat pans are sold separately.

## Power Seat Option

5" or 6" power lift

New easy access in the joystick proportional power seat speed control provides improved independence and access in performing daily living tasks and transfers.

## Reclining Comfort

The Admirals seat is a high back seating alternative that includes **multi-position 50° recline**, additional **lumbar support**, and adjustable flip-up arms. These features combine to provide outstanding comfort and resiliency.

# “Set The Pace” with PaceSaver® Scout M-Series

The *PaceSaver Scout M1* power base helps you enjoy an exciting, invigorating pace. Enabling you to spend more time doing things that you enjoy with family and friends. The American made *M1 Convertible™* is the **most advanced power base** of its kind.

Convertible with Dual Footplates  
Height, Length & Angle adjustable

**Drive With Ease** - The *M1 State-of-the-art controllers* driving ease, power, speed & efficiency are generations ahead of the integral controllers (joystick & power module in one box) used on many powerchairs. *M1's patented dual direction drive* is inherently the most stable drive platform.

**Directional Clarity** - *M1 Convertible™* patented flip-a-switch directional drive system features **AAP (Accidental Activation Prevention)** and is much **more reliable** than swivel seat switches. There is no chance of driving misdirection near stairs or platforms caused by the seat being swiveled a few degrees.

**Directional Drive = Optimum Performance** - For indoor maneuverability choose the short turning radius of front wheel drive and move outdoors with relaxing ease at 4.7 mph. On inclines take advantage of the natural weight shift for traction and control. **Go uphill in rear wheel drive and downhill in front wheel drive.** If you prefer the feel of rear wheel drive, you have a custom program for ease of control and performance.

Front-Wheel Drive

*State-of-the-art Dual Modular Controller makes the M1 Convertible . . .*

- ★ Easiest to drive with Advanced Drive Software and **ONLY** the *M1* has **separate front and rear drive** programs.
- ★ **Powerful** for climbing long hills. True 75 amp. power module (20% increase over integrals) is efficiently placed next to the batteries and **heavy duty** Reliance motors. (*M1-350* will climb a 140 yd. hill 11 times with a 350 lb. rider.)
- ★ Ergonomically stylish. The joystick module is small for **close table access**, always cool with no hot surfaces to burn user and **easy to use** with push button keylock.
- ★ Faster with the optimum control even at 4.7 mph (jogging speed). *M1* provides **more miles per charge** using shorter power cables increasing efficiency and power delivery to motors.

Rear-Wheel Drive

## Modular Controller

Small, no hot surfaces to burn user, easy to use joystick

High power, efficient power module

*M1 Convertible™* is small, lightweight and can be transported in the trunk of many cars or lifted using our **Magnum lift.**

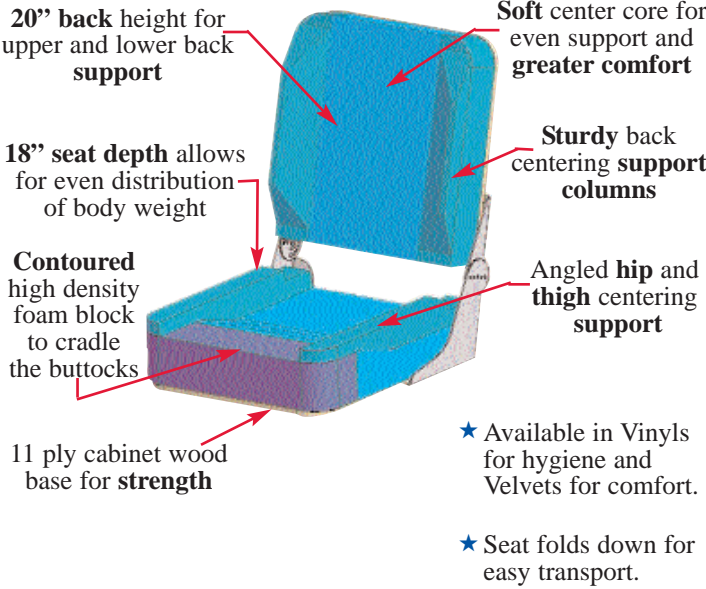

American Made

## Transports Easily

## The New Com-For-Back™ Bucket Seat Contoured for a Perfect Fit

## Small & Compact

- Drive with **Relaxing Ease**
- Great Indoor **Maneuverability**
- Exceptional Outdoor **Power**
- Long Term **Comfort Seating**
- **Long Lasting Beauty**
- **American Made**

Shown with optional  
Equalizer Tilt System

## Mirror Glaze™ Through & Through Colors

### Durable Automotive Finish

*PaceSaver's* revolutionary American made **Mirror Glaze™** extruded over ABS. The Mirror Glaze™ layer provides a rich “depth of color” reflective **automotive finish** with exceptional weatherability and U.V. colorfastness. The hardened acrylic “**scratch guard**” finish provides superior resistance to scratches and nicks when compared to painted plastics.

### Long Lasting Beauty

Because the color pigments are extruded “**through and through**” the entire ABS substrate, it will provide years of trouble free service. There is nothing to wear or chip off. It is like a piece of wood - solid all the way through. *PaceSaver American made* Mirror Glaze™ ABS has superior impact resistance compared to imported painted styrene plastics that are easily broken or cracked on impact.

## Micro-Light Charger

- Super Charger (carry along or optional on-board)
- Fast charging
- Automatic Brownout Adjustment
- Travel the world, adjusts automatically
- Batteries last longer

## 350 Lb. Capacity M1 also available
