The Ergonomic Wheelchair

The best care for a strong back

The patented **STRONGBACK** ergonomic design represents an evolution of the traditional wheelchair by integrating positive posture support into the frame. Every wheelchair user has the right to a wheelchair that keeps them active and comfortable and makes them feel free and independent.

It is our passion to increase people's comfort, health, and freedom. We are a young, dynamic and dedicated team that wants to revolutionize the wheelchair industry!

STRONGBACK Excursion

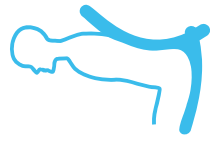

STRONGBACK24

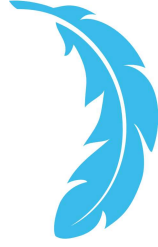

The STRONGBACK wheelchair made for all people

STRONGBACK is the first lightweight folding wheelchair to focus on the user's spine. Its unique ergonomic shape promotes a healthy, upright posture and ensures the user feels comfortable right from the start.

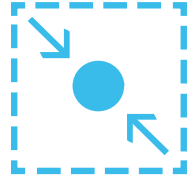

Along with its outstanding ergonomic design, **STRONGBACK** also impresses with its curved lines and meticulous attention to detail. And thanks to its low weight and well-thought-out folding design, transporting it in your car is easier than ever!

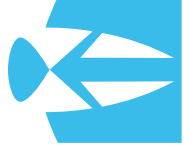

unique ergonomics
curved back supports
the natural lumbar
curve of the spine

ultra lightweight
among the lightest of
its kind
(19-26 lbs/9 to 13 kg)

compact size
gives you the
freedom to travel
anywhere

stylish
beautifully curved
lines with attention to
detail

"We have the **STRONGBACK** for my grandmother and she is extremely impressed with the comfort. I love how light weight it is – I can lift it myself to put it in the car. Also, the turning radius is great and it folds easily. GREAT product!"

Cathy, USA

Correct posture with the STRONGBACK wheelchair

The **STRONGBACK** wheelchair conforms to and supports the natural and healthy lumbar curve of the spine thus preventing the user from slouching forward and squeezing spinal discs with a tremendous amount of unhealthy pressure - decreasing this pressure results in healthier discs, a stronger back, and long-lasting comfort while seated.

STRONGBACK wheelchairs compared to regular wheelchairs

- **STRONGBACK** wheelchairs reflect and support the natural lumbar curve of a healthy spine.
- The shape of **STRONGBACK** prevents the user from slouching and putting too much pressure on the spinal discs.
- Its outstanding ergonomic design offers unparalleled comfort and promotes a healthy, upright posture.

How it works

The patented **STRONGBACK** ergonomic design represents an evolution of the traditional wheelchair by integrating additional back support into the frame.

ergonomic comfort-grip handles

user sits in a healthy position, the shoulders are back, the whole spine is aligned, the chest is out and the head is comfortably supported

integrated back support with simple Velcro straps for adjustability of the back support

desktop-length armrests

clothing guard side panels

seat tilted back to prevent the user from slipping forward and slouching

quick-release wheels for easy storage size reduction

swing-away detachable footrests

detachable anti-tippers

Smart design for daily use and easy handling

A restaurant visit is an occasion on which **STRONGBACK** can demonstrate all its advantages: it can quickly and easily be stored away in the car trunk and is ready for use in the blink of an eye. Its short armrests allow the user to move conveniently close to the table. Thanks to its modern color and its stylishly curved shape, the chair appears less like a wheelchair and more like a designer chair.

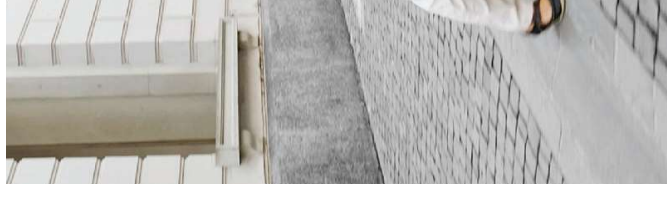

3 different rear wheel sizes for use on all terrain (8"/12"/24")

compact, folding design among the lightest of its kind

quick-release wheels

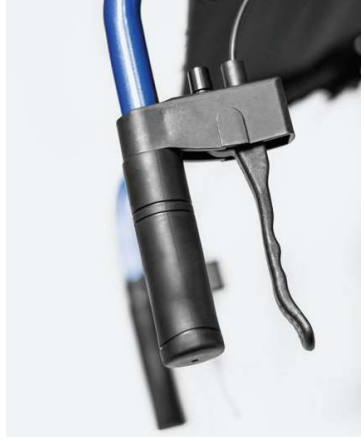

desktop-length armrests

swing-away, detachable footrests

comfortable and easy to maneuver
