

PERFECT FOR PATIENTS
PERFECT FOR CAREGIVERS

CREATING INNOVATION AND DIFFERENCE

DynaFlow

DynaFlow Mattress System is a medium to high risk system for patients who are at risk of developing Pressure Ulcers according to your sound clinical judgment. DynaFlow can also be used for patients who have an existing stage 1, 2, 3 and 4 Pressure Ulcer, in conjunction with your hospital's policy on pressure area management.

Mattress Control Unit

- Dimension: (L)12.3"x (W)6.7"x (H)4.9"
- Weight: 14.9 lbs
- Rated Voltage: 110-120 volts
- Max Current: 5A
- Rated Frequency: 60Hz
- Cycle Time: 3-95 mins
- 3 in 1 alternation
- Min/Max Pressure: 15-52 mmHg +/- 4 mmHg
- Static / Pulsation Function
- Protection Type: Class I, Type BF
- 10 Digital Adjustable Comfort Control
- Bottom Out Alarm: Visual / Audio
- Leaving Bed Alarm: Visual / Audio
- Power Failure Alarm: Visual / Audio
- User-Friendly LCD Control Panel
- Fowler Function
- Auto Function

Mattress Replacement

- Model No: DynaFlow
- Dimension: (L)80"x (W)36"x (H)10"
- Weight: 39.6 lbs
- Weight Capacity: 600lbs
- Cell Material: Blue Nylon with PU Coating
- Cell Number: 18 cells
- Cover Material: Blue Nylon with PU coating finish
- Base Material: Black Polyester with PVC Coating
- CPR Quick Release System

Perfect for patients and caregivers

PRESSURE MAPPING

DynaFlow provides constant low pressure by redistributing the patient's pressure over a greater area than a standard mattress.

- Equip with 2" convoluted foam base provides additional support during power failure situation
- PU cell design provides easy cleaning and minimizing the proliferation of bacteria
- Mattress replacement can accommodate patient weights up to 600 lbs
- Added safety feature for continuous monitoring patient's status on bottoming out and leaving bed
- Low Air Loss, Pulsation, 3-1 Alternation, Static and Rotation Therapies in one system

Low slip base cover is a plus to keep the mattress in place on the bed

The modular construction of the cells makes for simplistic repair and cleaning

Incorporates with automatic sensing technology for bottoming out prevention and pressure adjustment

DynaFlow can detect the pressure of patients' buttocks automatically during "Fowler Mode" and adjust the pressure based on these results.

Automatically sets optimal pressure based on patient's weight, height and position.

30 seconds of pulsation simulates a massage to assist in maximizing a patients comfort.

The mattress can be adjusted for "Fowler Mode" while acting in conjunction with the bed frame, assisting the medical staff while performing medical procedures.

Multiple lateral rotations provide alternative treatments to patients and medical staffs. Rotation therapy can be set from 3 to 95 minutes.

DynaFlow is your partner in protection and treatment of pressure ulcer

Cable management keeps electrical cables off the floor

CPR quick release system deflates the system within 20 seconds

Hanging bracket fits on all type of beds
