

The EW-10

We are pleased to announce our latest example of drawing outside the lines: The EW-10 Sport.

Striking. Athletic. Instantly recognizable. Its bold appearance, like any EWheels, is not shaped by accident. It is Shaped by Performance.

With a maximum speed of 15 MPH and a travel range of 40 miles on a single charge, the EW-10 is equipped with an advanced electronic remote key fob on/off power function, alarm system, secure under-seat storage, and a lockable rear storage box.
